FIG. 3

FIG. 3 is a schematic diagram showing two cross-sectional views of a device, likely a valve or actuator, in different states. The left view shows a closed state with a central rod (60') and a spring (72) pushing it to the left. The right view shows an open state where the rod (60) has moved to the right, compressing the spring (72). Various components are labeled with numbers: 4 (arrow), 24 (arrow), 45 (curved surface), 60 (rod), 60' (rod), 64 (curved surface), 66 (curved surface), 70 (curved surface), 72 (spring), 74 (curved surface), and 56 (curved surface). A dashed line indicates the path of the rod.
